STATE OF THE ART PARTYING

ENTERTAIN INSIDE AN ENGINEERING MARVEL

The excitement of flying in our ultramodern wind tunnel, guided by IBA certified instructors, provides an immersive experience that cannot be matched.

Four fans at the top of the tunnel draw air through the flight chamber and then drive it through return air towers

Airfoil shaped turning vanes in each corner maximize efficiency

The inlet contractor narrows to compress and speed up the air before it re-enters the flight chamber

Patented water cooled assemblies provide consistent air conditioning

WE PROVIDE EVERYTHING YOU NEED

- »»» *All the gear. All the training.*
- »»» *Flying time in the wind tunnel.*
- »»» *Photos & video to capture the experience.*
- »»» *All the event space your group needs for an unforgettable outing.*
